Avoid contact with eyes and skin.

**Respiratory protection:**

For brief or low-level exposure, use a respiratory device with a filter.  
For intensive or prolonged exposure, use a protective respiratory device independent of ambient air.

**Gloves:**

The glove material must be impermeable and resistant to the product/material/preparation. Due to a lack of testing, no specific glove material can be recommended for the product/preparation/chemical mixture. Select glove material based on breakthrough times, permeability rates, and degradation.

**Glove material:**

The selection of suitable gloves does not depend solely on the material, but also on other quality characteristics that vary by manufacturer. Since the product is essentially a preparation consisting of multiple substances, the resistance of glove materials cannot be predicted and should be tested prior to use.

**Penetration time of glove material:**

The exact breakthrough time is provided by the manufacturer of the protective gloves and must always be observed.

**Eye protection:**

Use safety goggles and face shield tested according to EN

**Body protection:**

Wear work clothes that cover arms and legs.

**Hygiene measures:**

Avoid contact with skin and eyes. Do not eat/drink/smoke during use. Wash hands after use.

**8.2.3 Limitation and supervision of exposure into the environment**

Take precautions to prevent the product from entering the sewage system. In case of contamination of water or sewage system, inform the responsible authorities.
